

Property Report HHUC – 2019

We have had a fairly active year at Highland Hills United Church.

Early spring saw the installation including wiring and plumbing for the dishwasher.

Later in the year the rear wall of the church was insulated and new siding installed. A new dusk to dawn light was also installed. The trees hanging over the parking lot have been trimmed back and some dead trees were removed.

Tried to look at bell tower and reconnection of rope but the weather did not cooperate.

We have installed a new lock and crash bar on the ramp door as the old crash bar could only be opened from the inside.

Looking forward we are working on some storage creation and looking toward commencing preliminary work on a potential elevator for the church.

Thanks to all committee members for their support.

Yours in His Service

Neil Darby, Co-chair
